TECHNOLOGY

Anton Zahoransky, the founder of the company, already set himself the goal of establishing standards and we have continued with this practice for more than 100 years. We now wish to set standards in the area of training courses, too.

For this reason, we have developed a new training programme to assist both yourself and your personnel in acquiring a maximum of specialised knowledge for use in everyday working life. It is set out in 4 stages:

## ■ BASIC COURSE

## ■ FOUNDATION COURSE

## ■ ADVANCED COURSE

## ■ EXPERT COURSE

These courses build upon one another and, naturally, the courses can be adjusted to suit your particular needs.

We will be happy to welcome yourself and your personnel to one of our courses.

# The best way to take... ... the lead is to start whilst others are still thinking about it

### ■ Registration

To register for a course, send us either an  
E-Mail: [service@zahoransky.de](mailto:service@zahoransky.de)  
or Fax: +49 7671 997-299

We will then send you a confirmation of the date and all relevant information about the course. If you have any questions please contact our service department:  
+49 7671 997-138

### ■ Course fees and discounts

The course fee covers one participant and one course day and applies to the first two participants. For each additional participant, there will be a progressive discount of 10% for the third participant, 20% for the fourth, 30% for the fifth, etc.

In order to arrange the courses better, we offer an early booking discount of 10% of the total price if your registration is received at least four months prior to the course date.

### ■ Number of participants

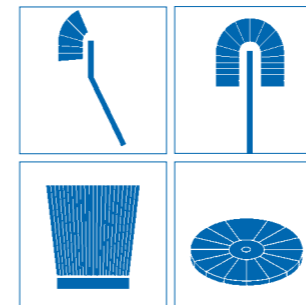

Zahoransky training programmes are held for a minimum of 2 and a maximum of 8 participants. Each participant will have enough time to have practical experience on Zahoransky machines.

### ■ Cancellation

Your understanding is requested in the necessity for us to charge a cancellation fee of 10% should you cancel the registration for a course at least one week prior to the course. If the cancellation is received later than this, we will have to charge the whole course fee.

## ■ Toothbrush Machines

|   |          |
|---|----------|
| <b>Basic course (201)</b><br>Operation and maintenance of toothbrush machines               | 2 days   |
| <b>Foundation course (110)</b><br>Pneumatics, electronic techniques and their components    | 1 day    |
| <b>Advanced course (202)</b><br>CNC programming and model changeover on toothbrush machines | 2 days   |
| <b>Expert course (203)</b><br>Adjusting and optimising customer specific machines           | 2-5 days |

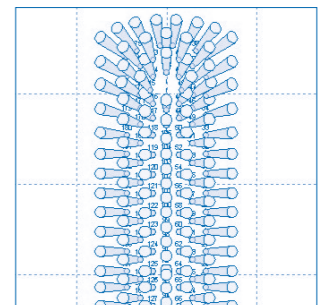

## ■ Drilling And Tufting Machines

|   |          |
|---|----------|
| <b>Basic course (401)</b><br>Operation and maintenance of drilling and tufting machines               | 2 days   |
| <b>Foundation course (110)</b><br>Pneumatics, electronic techniques and their components              | 1 day    |
| <b>Advanced course (402)</b><br>CNC programming and model changeover on drilling and tufting machines | 2 days   |
| <b>Expert course (403)</b><br>Adjusting and optimising customer specific machines                     | 2-5 days |

## ■ General Courses

|  |        |
|--|--------|
| <b>3D-BrushDesigner for toothbrush machines (901)</b><br>Designing and programming of new brushes  | 1 day  |
| <b>3D-BrushDesigner for drilling and tufting machines (902)</b><br>Designing and programming of new brushes                              | 2 days |
| <b>CAD Converter for drilling and tufting machines (903)</b><br>Conversion of CAD drawings into brush programmes                         | 1 day  |
| <b>Tufting tools and materials for drilling and tufting machines (904)</b><br>Setup of tufting tools and handling of different materials | 2 days |
